"The verb bara (to create) can also mean "to shape" or "to divide"

Ibn Ezra, commentary on the first verse of Genesis.

“Traditional astrology (together with the new techniques which have been added on to it) consists of a vast mass of disconnected assertions, which almost certainly are a mixture of truths, half-truths, blind guesses, and Superstitions. And, since these assertions do not relate back to any fandamental and proven laws, it is impossible for the astrologer to sort out the wheat from the chaff, since there are not reliable criteria which he can use. By constantly questioning the assertions of astrology, and by digging deep into the fandamental principles which anderlie them, we can eventually hope to build up a new astrology on the ruins of the old: an astrology in which the fandamental laws (or some of them) are know, even though there will always be more to discover about how they operate in particular cases. This new astrology is likely to resemble the old astrology in many ways, but it will not be the same. It is likely to be more beautiful than the old astrology, for it will be closer to truth: it will enable us to hear more clearly the ’music of the spheres. ”

- David Hamblin, D.F.Astrol.S., ’The need for doubt and the need for wonder’, Astrological Journal, vol.24, no.3, summer 1982, pp.152-7.

My theories:

1- A person's sun on the natal chart has to be harmonic with position of sun at his death time. This can be any harmonic, that zodiac divides on two.
e.g. H-1, H-2, H-4, H-8, H-16, H-32, H-64.....2^n
2- Family member's sun position on their birth chart has to be in exact harmonic.
it applies to partners and guru-disciple also.
3- The sun position in the beginning an event has to be in exact harmonic with the end of the event.
4- Any related events' sun has to be in exact harmonic.
5- An important event's sun(e.g. marriage , accident) must be in exact harmonic with the natal sun.
6- A country's all presidents' sun positions in exact harmonic with each other's and the country's sun position.
7- People who involved in same event have their sun positions in exact harmonic.

Note: I strongly believe that relationship between converse transit and natal sun needs to be further researched to see if they are in exact harmonic. Throughout my research, I found out that sometimes they are in exact harmonic, sometimes they are not. The reasons could be:

1- Converse transit sun and natal sun do not have to be in exact harmonic
2- The sun on the birth chart may not be exactly corrected.

If the second reason is correct; the converse transit sun must be in exact harmonic with the natal sun. That means we can calculate the exact natal sun, because there is only one birth time that the converse transit sun is in exact harmonic.

Technique :

1- Only harmonics that divide Zodiac into 2 must used.
2- There is no limit, that is: H-1, H-2, H.4, H-8, ..., H-131072, H-262144,.....
3- Orb is zero second.
4- Sidereal Zodiac must be used.
5- I used Ayanamsa 23°45'56" for Year 2000. Speed of precession is 50.2388475
6- It is only midpoint and planetary pictures used no classical aspects.
7- Zet astrology software was used, because other software can not perform these calculations. Zet 9 Geo , Swiss Ephemeris version 2.01

Used progressions :

1- Solar
2- Lunar and progressive Lunar
3- Secondary and converse
4- Tertiary and converse
5- Minor and converse
6- Synodic Lunation and progressive Lunation
7- The planet returns, to do with the event ,e.g.for death Saturn Return, for marriage Venus and 7.Lord-Return,for birth Mercury return.
8- All progressions must show the same events.

Harmonics :

All Harmonics are equal. Therefore must all harmonics are checked.
for example : A woman has two children.Her Sun can to a child in H-8192, to other in H-16384 .

All harmonics have to show the same event.Wenn a harmonic marriage shows and others do not, then does not the correct birth time. Then the birth time must be corrected.

Operation Entebbe

Operation Entebbe was a counter-terrorism hostage-rescue mission carried out by the Israel Defense Forces (IDF) at Entebbe Airport in Uganda on July 4, 1976.

Skirting thanderstorms over Lake Victoria, the Hercules transports neared the end of the 7hour, 40-minute flight. A SUrprise awaited them: the runway lights were on! Despite this, they landed andetected at 23:01 (local time), only one minute past their planned arrival time.

The soldiers freed the hostages in a lightning attack, killing all eight terrorists in the process. Tragically, force commander Yoni Netanyahu was killed as he led the hostages toward the safety of the aircraft; additionally, two hostages were killed in the crossfire inside the airport. The other squads accomplished their missions in virtually the same time as during the "dryrun." By 23:59 the planes were on their way home. The operation, which was predicted to last one hour, in fact took only 58 minutes.

Plane crash of Turkish Airlines at Amsterdam's Schipol Airport. Turkish Airlines Flight TK 1951, with 127 passengers and seven crew members, crashed just short of the runway. A faulty altimeter appeared to be at least part of the cause. Although the plane broke into three pieces, it did not catch fire. Nine people were killed, six were critically injured and 80 sustained other injuries. The plane took off from Istanbul at a local time 6:22 AM according to the BBC

Swissair Flight 111

At 00:18 UTC (20:18 eastern daylight savings time) on 2 September 1998, the McDonnell Douglas (MD) MD-11, operating as SR 111, departed John F. Kennedy (JFK) International Airport in Jamaica, New York, United States of America (USA), on a flight to Geneva, Switzerland.

At approximately 01:30, observers in the area of St. Margaret's Bay, Nova Scotia, saw a large aircraft fly overhead at low altitude and heard the sound of its engines. At about 0131, several observers heard a sound described as a loud clap. Seismographic recorders in Halifax, Nova Scotia, and in Moncton, New Brunswick, recorded a seismic event at 01:31:18, which coincides with the time the aircraft struck the water. The aircraft was destroyed by impact forces. There were no survivors.

The accident occurred during the hours of darkness. The centre of the debris field, located on the ocean floor at a depth of about 55 metres (m) (180 feet), was at the approximate coordinates of latitude 44°24'33" North and longitude 063° 58'25" West.

Earth Observatory in Palisades, NY, 21 miles north of the city. These times are based on seismographs of the Observatory, "with calculations that take into account the 17 seconds it takes a seismic wave to travel to Palisades,
said seismological researcher Dr Won-Young Kim." It is calculated that the time could be off by 2 or 3 seconds, but no more.

The north tower was hit at 8:46:26 AM ("about 2 minutes earlier than has been widely and incorrectly reported by the NY Times and others"); the 2nd plane hit the SUuth tower at 9:02:54 AM. The SUuth tower collapsed at 9:59:04, or 56 minutes after impact, the north tower fell at 10:28:31, or 102 minutes after it was struck.

Since we're being Virgoan here, I checked Maporama.com, which gave coordinates of 40N42:41, 74W00:45, which sounds right, as the ACS Atlas gives Wall St as 40N42, 74W01. Love, Diana.

The north tower was hit at 8:46:26 AM
the 2nd plane hit the south tower at 9:02:54 AM.

Eschede train disaster

The Eschede train disaster occurred on 3 June 1998, near the village of Eschede in the Celle district of Lower Saxony, Germany, when a high-speed train derailed and crashed into a road bridge. 101 people died and around 100 were injured. It remains the worst rail disaster in the history of the Federal Republic of Germany and the worst high-speed-rail disaster worldwide. The cause was a single fatigue crack in one wheel which, when it finally failed, caused the train to derail at a switch.
At 10:59 (10:57:28 in Germany-wiki) local time (08:59 UTC), one of the now-derailed wheels struck the points lever of the second switch, changing its setting.
The front power car braked 10:59:21 to 11:00:32 clock from a speed of around 170 km / h automatically to zero.

Newton, Sir Isaac 4 January 1643 at 01:38 (= 01:38 AM) Woolsthorpe, England, 52n50, 0w40

British astronomer, physicist, mathematician and astrologer who showed how the universe is held together. Newton is often described as one of the greatest names in the history of human thought. Biographers speak of his Annus Mirabilis (year of wonder) as aroand 1665-66, "with incandescent intensity," when he began his studies into light and color. The mythic story of the apple falling was said to have happened during this time.

Halley, Edmoon 8 November 1656 at 13:20 (= 1:20 PM) London, England, 51n30, 0w10

British scientist who explored the Atlantic coast, surveying the tides and coastline of the English channel, publishing a topographical map in 1702. A professor of geometry at Oxford in 1703, he was appointed Astronomer Royal in 1721. He won fame for his accurate prediction of the return in 1758 of the comet which was consequently named after him.

Halley's father, a wealthy soap manufacturer, was brutally murdered in a politically-motivated assassination. He became a colleague and close friend to the reclusive Isaac Newton, paying himself for the publication of Newton's "Principia."

Madrid train bombings

The 2004 Madrid train bombings (also known in Spain as 11-M) were nearly simultaneous, coordinated bombings against the Cercanías commuter train system of Madrid, Spain, on the morning of 11 March 2004 – three days before Spain's general elections and two and a half years after the September 11 attacks in the United States.

Three bombs exploded. Based on the video recording from the station security system, the first bomb exploded at 07:37, and two others exploded within 4 seconds of each other at 07:38.

Plane Crash: NY La Guardia

On January 15, 2009, US Airways Flight 1549, an Airbus A320 piloted by Captain Chesley B. "Sully" Sullenberger and First Officer Jeffrey Skiles, made an unpowered emergency water landing in the Hudson River after multiple bird strikes caused both jet engines to fail. All 155 occupants, the passengers and crew, successfully evacuated from the partially submerged airframe as it sank into the river; they were rescued by nearby watercraft. http://en.wikipedia.org/wiki/US_Airways_Flight_1549

According to the cockpit voice recorder (CVR) transcript, at 15:24:54, the LGA air traffic control tower (ATCT) local controller cleared the flight for takeoff from runway 4.

According to the CVR transcript, at 15:27:10.4, the captain stated, “birds.” One second later, the CVR recorded the sound of thumps and thuds followed by a shuddering sound.

The CVR recording ended at 15:30:43.7., the captain stated, “we’re gonna brace.”

In May 2013, Wayne Turner sent more precise information by email: p. 14 of the November 1900 issue of 'Star of the Magi', it is actually as follows (written by Willis F. Whitehead): "Prof. Cunningham informs me that he visited Canton, Ohio, on September 30, 1896, and saw Mr. McKindley's mother, and she told him Mr. McKinley was born at half-past 11 as [sic] night. Exact Harmonics :

Rule : Harmonics are valid for Arc and for the time.
e.g.: The sun position in the beginning an event has to be in exact harmonic with the end of the event.. These harmonics can add or subtract each other.

Note: The short distance has been measured. The result wouldn’t change even we measure the long distance. If the long distance is being calculated,then we must do reverse calculation.

Example :
4°12’02" Fish
17°09’16" Leo

First of 17°09’16" Leo to virgo calculated : 12°50’44"
Because 4°12’02" Fish with Virgio 4°12’02" has 90° difference, 4°12’02" added to 12°50’44".
12°50’44" + 4°12’02" = 17°02’46"

A-Shorter Distance:

difference : 12°50’44" + 4°12’02" = 17°02’46"

Exact harmonic = 16°52’30" + 10’32" = 17°03’02"
17°03’02" - 17°02’46" = 16"

Distance from Exact-harmonic = 16"

together : 25°47’58" + 120° + 17°09’16" = 162°57’14"

Exact harmonic :

162°57’14" - 135° = 27°57’14"
28°07’30" - 27°57’14" = 10°16’

Bush, Jeb

11 February 1953 at 20:50 (= 8:50 PM) Midland, Texas, 32n0, 102w05
American politician and noted family, the second son of President George Bush.

Source Notes
Richard Nolle quotes him by email. He first responded "in the morning" and when pressed to please look at his B.C., changed the time to 8:50 PM. (Formerly, LMR quoted a colleague for 7:00 AM from his wife, some years ago. Who's Who gives a birthplace of Houston, TX)
Starkman rectified to 2.28.16 CST

A birth time is accurate, if:

1- Form certain planets exact Harmonic to their natal positions and repeating them in several progressions.
e.g.
Venus at marriage,
Mercury at birth,
AC and/or AC ruler important events,

2- Specific midpoints or corresponding planets (eg Moon, when it comes to mother or Venus, when it comes to daughter) are at several progressions repeatedly activated,
example: If the marriage is node / Venus midpoint in Secondary activated by node or Sun by Venus, in Converse by AC ruler in Tertiary progression. It does not matter what planet activated this midpoint, but same exact midpoint by harmonic activated several times.

3- If an event's midpoints or ruling planets are being activated in different progressions.

For example:
At the Marriage Venus / Node, Venus / Sun, Node / Neptune, Venus / Neptunee
At birth Mercury / Node, Mercury / Jupiter Sun / Sun, Moon / Jupiter, Moon / Mars, Mars / Jupiter
for female birth node / Venus, or Venus / Sun
In our example below, Venus(daughter)/Neptune(drugs)

Family trauma 27 January 2002 (Daughter arrested on a drug bust)
Birthtime 8:50 PM
In Jeb Bush's Radix Venus/Neptune was

Mystery Rectification Chart

http://skyscript.co.uk/forums/viewtopic.php?t=4534

Mister X was born on August 19th, 1966, Rio de Janeiro, Brasil. His birth was timed by an astrologer to the second. He was born at night, in a moment between 12h01 am and 6am. (update : 12:30am and 2:30am)

Unfortunately we only have 3 events for this chart, so no technique can be perfect, but this is usual for young people. Nevertheless, the events are very important in his life! I hope that, despite this limitation, all members can at least try a rectification at the best of their efforts.

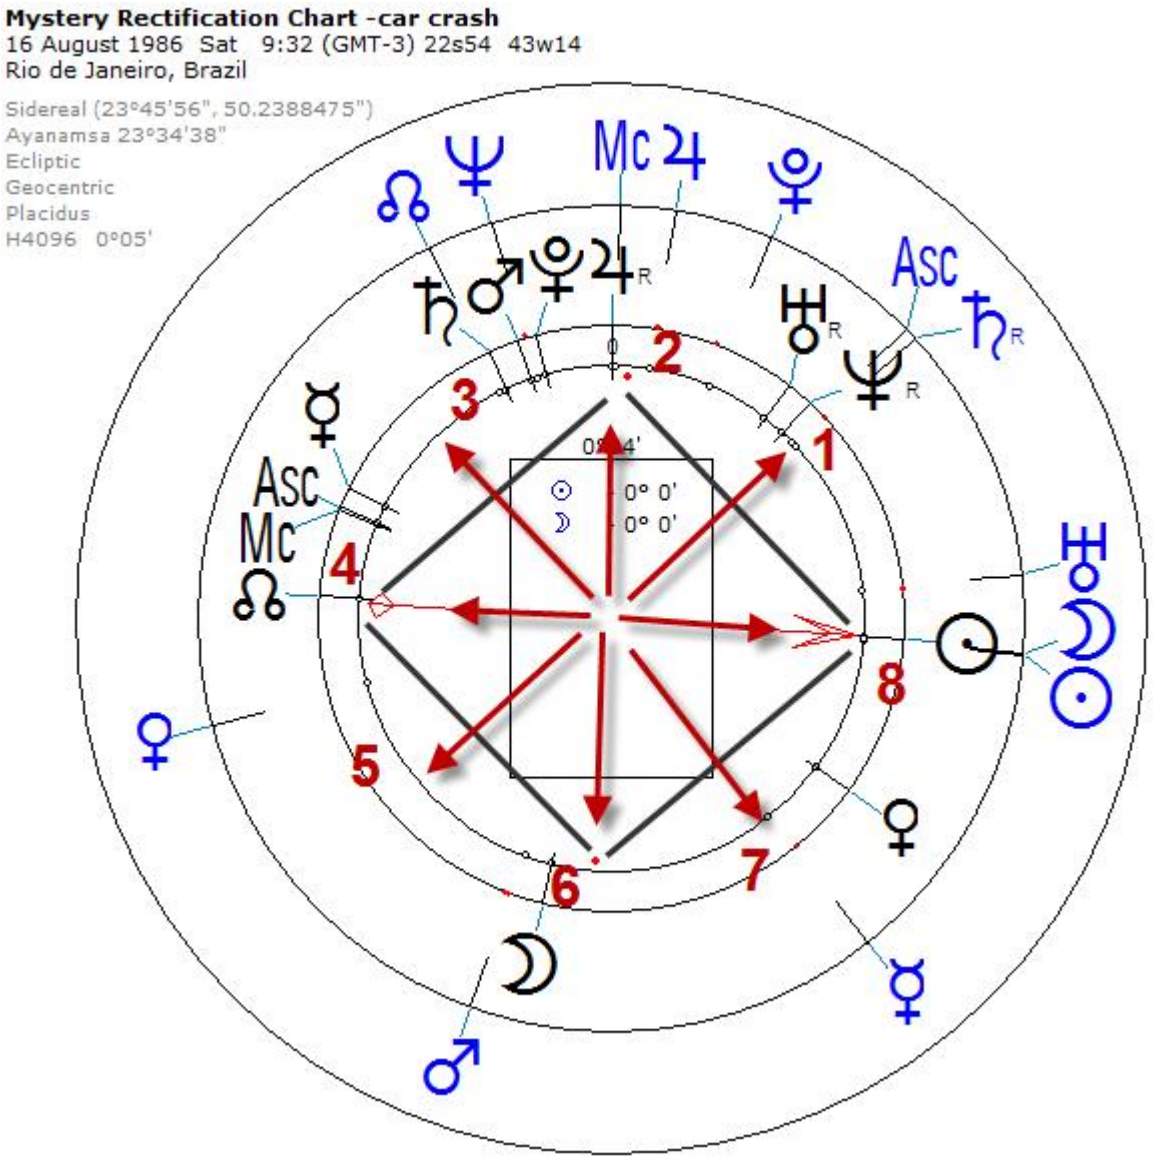
1 - On May 19th 1976, around 10h30 PM, his grandather died of a heart attack in his arms, while the two were watching a soccer game. He felt guilty through his childhood, because he was the one who insisted the grandfather would take him to the match.

2 -On January 18th, 1979, around 5 AM, his father, who was an alcoholic, committed suicide after being left by his wife (Mister X´s mother). He killed himself with cooking gas.

3- On August 16th, 1986m, exactly at 9h32 AM, in a interstate Highway between Rio de Janeiro and Sao Paulo, he suffered a car crash and became paraplegic. He was planning in having a major in Sport and Fitness. After that, he changed it for becoming a lawyer. Nowadays he works for a non profit organization that fights for the rights of the handicapped.

Sun transit needs in 4096 harmonic about 2 hours 12 mins for whole circle. From 0:17 to 2:29 we have 8 options (exact harmonic points). Approximately every 16-17 minutes an option.

transit at 00:17
Accident time provided is exact.



1. option	00:34
2. option	00:50
3. option	01:07
4. option	01:23
5. option	01:40
6. option	01:56
7. option	02:12
8. option	02:29

if you control these options with progressions, you can find the right birth time.

1- Example: Barack Obama 29.03.1959 19:24 (GMT + 02:45) Alego Kenya , 34°E 15',00°S 04'

6 November 2012 at 11:59 PM in Chicago re-elected for second term as president, moment shortly before Romney's concession speech.

Mercury is Obamas AC and MC ruler, and this retrograde Mercury on 06.11.2012 was on Obama's MC.
Not only transit Mercury but converse was also retrograde and was on Obama's MC.Much better Natal MC stands to ME in Harmonic and both are between natal JU/UR

this means: MC = ME = JU/UR

00°00' = 5°37' = 11°15' = 16°52' = 22°30'

This 0 ° points can be added or subtracted with the planetary positions.
example: He was reelected for a second term as US president on 6 November 2012.
Barack Obama am 6.11.2012

ME is both AC and MC ruler.

natal MC	17°55'	- 11°15'	= 6°40'
transit ME	17°49'	- 11°15'	= 6°34'
converse transit ME			= 6°14'
natal ME			= 7°03'
secondary ME	1°10'	+ 5°37'	= 6°47'
tertiary ME	11°50'	- 5°37'	= 6°13'
tertiary converse ME	17°45'	- 11°15'	= 6°30'
secondary converse UR	0°29'	+ 5°37'	= 6°06'
secondary converse PL	17°43'	- 11°15'	= 6°38'

this means :

If we look at H-512, we are even easier to see and we do not need the above calculations.

H-512 Solar Return

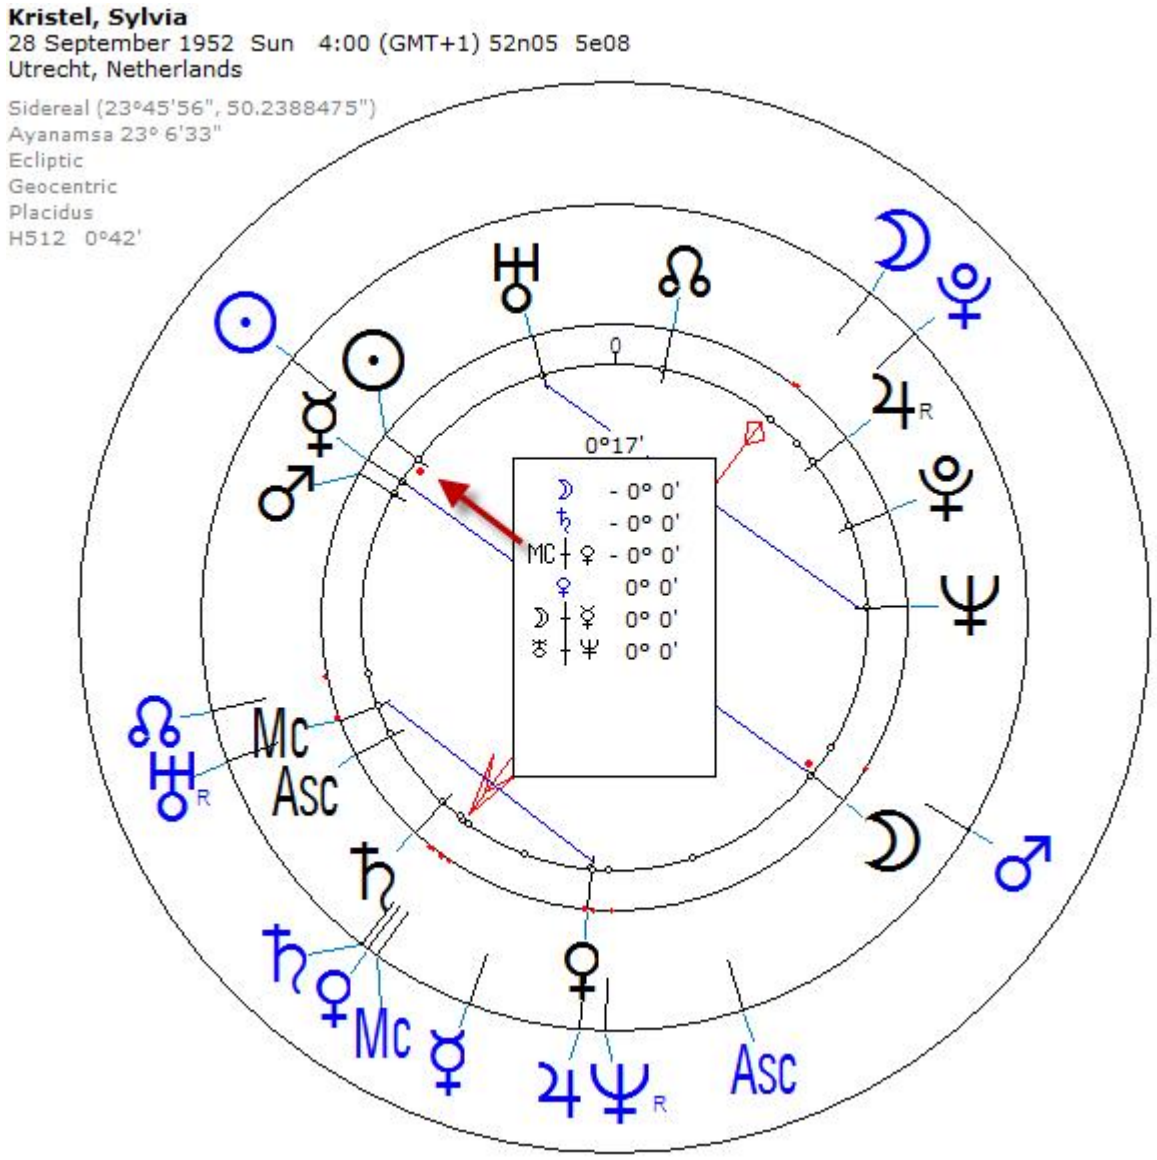
As we can see here:

Solar AC = Solar Venus (Natal MC lord) = Solar Saturn = Solar Moon = Natal Sun = Natal Moon

moreover : 8.House Lord Jupiter = MC lord Venus
Solar AC (Skorpion) Lord Mars = Natal Mars

Solar Uranus =Solar AC = Natal Uranus = Natal MC
Solar Pluto = Natal Saturn

All these are exact.



3- Example : Sandra Bullock

At 03:15 26 July 1964, Arlington, Virginia, USA
Event: Mother died on 4.April 2000 Arlington, VA, USA
H-512 Solar ,Natal AC is Gemini
It should be for events that have to do with the mother, pay attention these points :

1- MC-IC axis (In this book it is shown as MC)
2- Fourth and 10 House Lord (by Whole House System, in this example, Mercury and venus)
3- 7. and 12.House Lords
4- Moon (mother)
5- Venus (female person)

Solar Moon = Natal Saturn = Natal MC = Natal Uranus = Lunar Mercury = Lunar Uranus
Solar AC = Solar Uranus = Solar Mercury (Natal 4. Lord) = Mars/Saturn = MC/Mars = Lunar Venus (12.House Lord)
Solar MC = Venus (12.House Lord)/Saturn
Solar Venus (12.House Lord) = Mars
Solar Saturn = Mars/Jupiter (7.House Lord)
Solar Jupiter (7.House Lord) = Solar Neptune = Neptune/Pluto
Solar Mars = Solar Pluto = Sun/Jupiter (7.House Lord) = Lunar Node

Lunar MC= MC/Pluto
Lunar Saturn = Sun/Node = Jupiter (7.House Lord) /Saturn
Lunar Mars = Natal Pluto
Lunar Neptune = AC/Saturn
Lunar AC = Mars/Pluto
Lunar Pluto = Natal AC = MC/Neptune

When the mother's death:
MC/Saturn,MC/Mars, MC/Neptune,Moon/Uranus,Moon/Mars,AC/Saturn,Venus/Saturn,4.House Lord/Saturn midpoints very important. Many of these midpoint in this case are activated.
Transit and progressions must view the event clearly and without doubt.
Below Solar is shown.

Hiroshima :

6 August 1945 at 08:15 (= 08:15 AM) Hiroshima, Japan, 34n24, 132e27

In mundane Astrology Aries Ingress important, applies for one year. Progressions of these Igress calculations are derived. For Hiroshima we take Ingress of birth 1945.For Ingress we take where the explosion took place. And we derive progressive Horoscopes.

The first thing we need to know whether ingress Radix has dangerous planetary pictures.

13. April(Ingres day) until 6.August = 115 days = 90 + 22.5 + 2.8 (harmonic day)
11 Februar (Japans birthday) to 6.August = 177 days = 135 + 33.75 + 5.6 + 2.8 (harmonic day)

Since ingress chart is exactly, it is also better than speculative Countries' charts.

Transit on 6 August 1945 08:15

Transit Sun shows day, hour and minute is exactly harmonic.

transit Sun = transit pluto = transit Moon = transit Node = Ingress Sun = Ingress AC = Ingress Venus (Ingress 12.House Lord-Whole House System)

Because transit Moon = transit Sun is, We will handle it like a Moon phase.

Extremely important are the AC, MC, AC and MC Lord of Ingress.In this Ingress Mercury both of AC (Virgo) Lord and MC (Gemini) Lord. On August 6, Mercury was stationary retrograde, nearly stood still. If we look at H-16, Mercury is in transit AC / AC Lord one of the most important midpoint of Horoskops. This brings us to a rule which all harmonics must show the same event and are compared with each other.

Transit Mercury (Natal AC Lord) = AC/AC Lord

on 6.August 1945 11°46'27" Leo
7 August 1945 11°47'57" Leo
8 August 1945 11°44'10" Leo

Moreover : H-2048

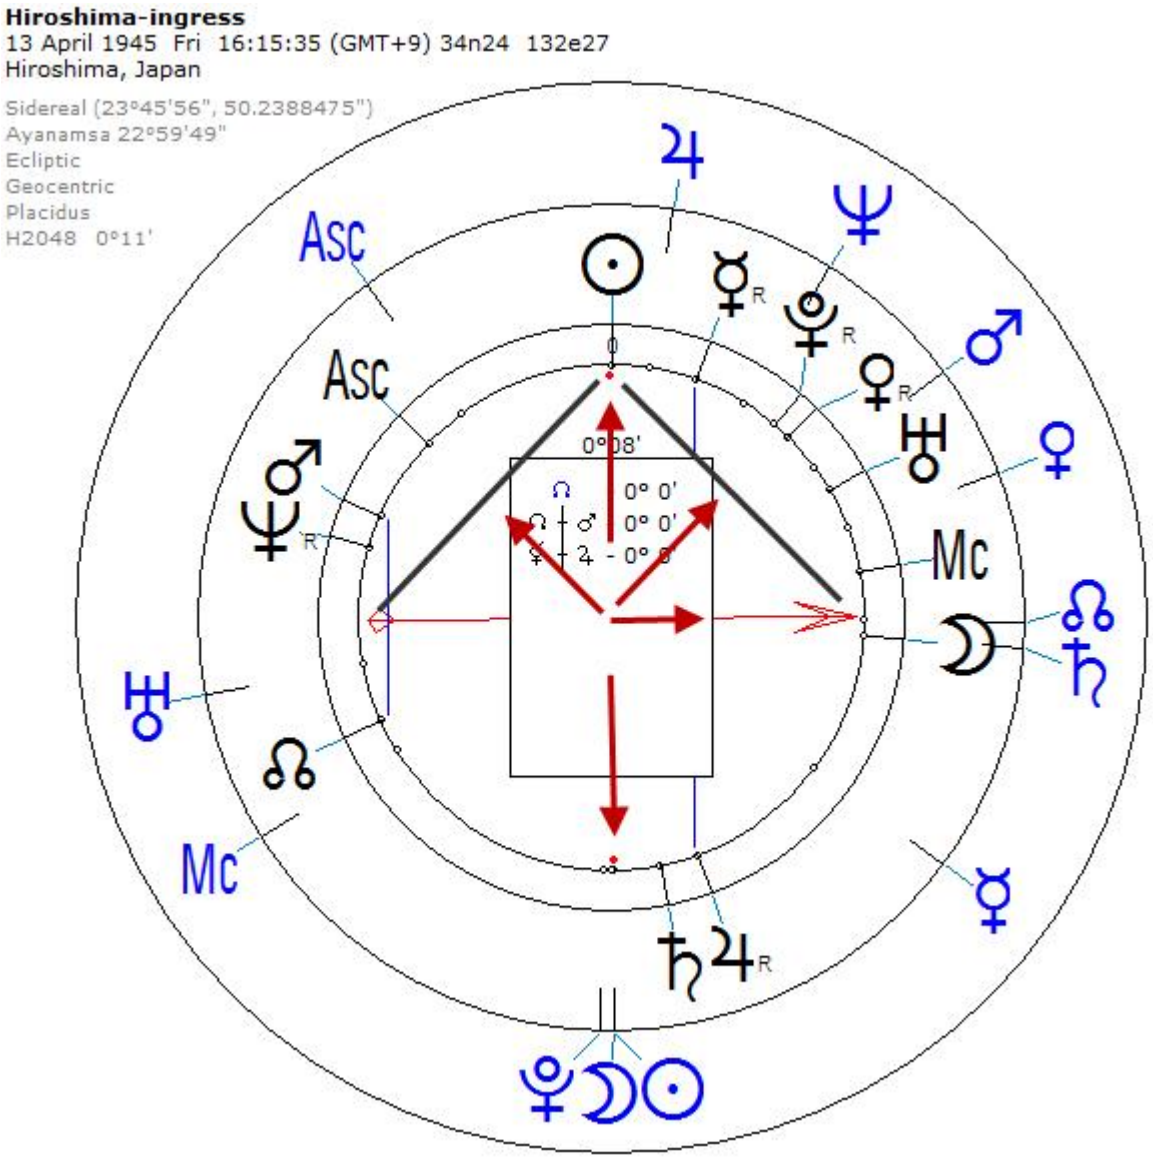
Transit MC = Natal Uranus
Transit Uranus = Natal MC

in H-16 : Transit Uranus = Transit MC

if we compare both Harmonics 8H-16 and H-2048:

Transit MC = Transit Uranus = Natal MC = Natal uranus

Below is H-2048 transit on 6 August 1945 8:15 a.m.



A day before is a New Moon occurred and Newmoon-MC was 15°32'48" Leo.
Natal Mercury (Ingress Mercury) on April 13 is 00°31'04" Aries came and made exactly harmonic with Newmoon-MC. Difference was only 00°01'44" (we subtract 45 °) .

On 06.08.1945 28 days (22.5 + 5.60) earlier of 09.07.1945 has a total Solar eclipse occurred.
Because 28 days Harmonicday (22.5 + 5.60) is, eclipse-Sun = Ingress-Sun
This brings us to another rule:
Eclipse-day must to Radix-and day of event in Harmonic.
difference between eclipse and Radix(Ingres) is 87 days = 90 – 2.80

Eclipse-AC = 26°46'09" Aquarius

By using exact harmonic points, 100% of time a person's birth time could be found out exactly.
As it is shown with two examples below.

First Example :

For Princess Diana two birthtime be claimed.

In the same issue, Isaac Starkman gave same date, also forTel Aviv, "rectified from 10:30 AM local time."
Isaac Starkman :
"Tomorow Benjamin Netanyahu will swear for a second time as Prime Minister of Israel. He was born on 21 Oct 1949 in Tel Aviv (not Jerusalem as in astrodatabank). Various times were given: from 9.30 EEST to 11.45 EEDT. All astrologers agree that he has Sag rising. My rectification is 11.14.48 EEDT Asc 22Sag55'."
(Noel Tyl quotes Tel Aviv astrologer Dalia Stupp who declared in a goup of some 60 people that she had gotten the data from Netanyahu himself and read his chart for him, October 19, 1949, 11:45 AM EEDT.)

Benjamin Netanjahu's birth time must be 11:45.

UK Royal Family

In order to correct a birth time the events must be chosen that are precisely noted.

I want to be the first example of Prince Williams horoscope show, assuming this is the time of the event exactly. Having corrected birthtime with a event time, we need further to control this corrected birthtime with other events. If not match with other events, we must correct again.
With the new birth time we have to continue like this until we find a birth time that corresponds with all events.

William, Prince (1982)

21 June 1982 at 21:03 (= 9:03 PM)Paddington London, England, 51n32, 0w12
British royal family, the first-born son of Princess Diana and Prince Charles, the heir to the throne of Great Britain.

With the event-Sun are the possible points exactly Harmonics: If the exact time of an event is known, we take the harmonic points that are close to the event. The beginning of the event is the closest to harmonic points.

first possible time : 21:02:53
second possible time : 21:00:48
third possible time : 20:58:44
fourth possible time : 20:56:40

First, these four harmonic points are compared with important events in the person life to find out which one is the possible birth time. Then this birth time is compared with birth times of his/her family members. If this harmonic point does not fit his family members birth times, we check other one of four harmonic points till find the right fit with other family members.

Pope Benedict XVI
Joseph Alois Ratzinger

16 April 1927 at 04:15 (= 04:15 AM) Marktl, Germany, 48n15, 12e51
German-born ecclesiastic, a Roman Catholic who was elected Pope on April 19, 2005 at about 5:50 PM local time at the Vatican, taking the name of Benedict XVI.

source Notes
Taeger Collection quotes birth certificate; Bordoni gives same information; Sy Scholfield quotes an article by Patricia Yollin and Suzanne Herel on 20 April 2005 in The San Francisco Chronicle PG A.12: "Joseph Ratzinger was born at 4:30 a.m. on April 16, 1927, to parents named Mary and Joseph."

Pope John Paul II survived an assassination attempt on May 13, 1981 by Turkish gunman Mehmet Ali Agca (born January 9, 1958) in the streets of Rome as he rode in his open car. The time of 5:21:31 PM is precise as his watch stopped at the exact time of the shot.

Kühr, Erich Carl

13 May 1899 at 14:15 (= 2:15 PM) Berlin (Berlin), Germany, 52n29, 13e21

German astrologer and writer, a strong advocate of the use of primary directions. Highly prominent, he was famed for his research though inclined to fatalism. His books are not translated into English.

source Notes
Heinz Specht quotes him. (Astrological Pioneers of America file has 2:25 PM; Hans Taeger quotes A. Umgelter for 2:15 PM and Kampherbeek for 2:18 rectified.)

Died after a long illness with tuberculosis 2/18/1951; 7:30 AM MET, Gmain, Bavaria.

Marr, Alexander

12 April 1919 at 13:11 (= 1:11 PM) Zurich, Switzerland, 47n23, 8e32
Swiss-born German astrologer, he moved to Germany at age one. He was one of the first European astrologers to work with computer programs, in 1964, having access to a large IBM computer. At age 45 he learned programming and wrote all of his own astrology programs, using the Topocentric system.
source Notes
From Isaac Starkman in early April 2009, correcting a time of 12:11 in the original record. Starkman quotes from Marr's book "Astrologers, King, Politicians and Others" and clarifies that Marr used to give his time in UT, not MET. .....The time of 12:11:34 PM MET is excruciatingly and compoandedly rectified by himself over time."

normally between mother and her child, mother's birth time from natal chart is taken to find the mother's correct birth time. However I will take child's birt time as natal to calculate mother's birth time proggressions. With this method, mother's birth time is checked twice to make sure is correct.

In our example, we calculate Progressions and converse Kate's (1979 born) birth time to Oliver's (1976 born) birth time.

If a planet a midpoint shows e.g. VE = MO/PL , then the midpoint planet MA and PL are exactly harmonic in progression.

1-VE = MO/PL
2-PL = MO = SU

3-MC = AC/MA
4-MA = AC = AC = MA/PL

Other characteristic in the correct times occur, these are the same midpoint or same harmonics activated in different progressions.

Year and day Harmonics:

Rule: Important events in a person life always occur in years that harmonic with the birth year (harmonic year), birth day(harmonic day), and birth time.
The most important harmonic years are;
4;8;11;14;17;20;22.5;28;33.5;36;40;42.5;45;47.5;50.5;56;60;62.5;67.5;70;73;75;80;84;86;90

Those numbers are given as years are harmonic in days and in minutes(Even a very short event has exact hamonic with the beginning and ending of the event.) also.
If we pay attention closely, we see the time of the beginning and end of an event are in exact harmonic.

Degree	Year/Days/Minutes
2°48’45"	2.80
5°37’30"	5.60
11°15’	11.25
16°52’30"	16.85
22°30’	22.50
33°45’	33.75
45°	45

You can also add or subtract these numbers together.

Example :

2°48‘45"+5°37‘30"=8°26‘15"
22°30‘+5°37‘30" = 28°07‘30"
22°30‘+11°15´ = 33°45´
22°30‘+11°15´+5°37‘30" =39°22‘30" etc.
